

The Brain

Even though your brain is a _____ part of your body, it can do more jobs than the most powerful _____ ever made.

Your brain controls:

-
-
-
-
-
-
-
-
-

Different parts in the brain do _____ things. Some parts help you _____ and _____, some help you to _____ and _____.

Some help you with _____ or to move your _____, _____ and _____. Your _____ does all of these things for you and many more. It sounds easy, but it is _____. Your brain is working very _____ all the time. Your brain is _____!
